

Case Study 01: Beverage Sales & Regional Distribution Analytics

POWER BI

Interactive Sales Performance, Consumer Behavior & Regional Distribution Tracking

OBJECTIVE

To analyze regional sales performance and consumer purchasing behavior to optimize beverage distribution strategies across key divisions.

KEY BUSINESS INSIGHTS

- Market Leader:** Dhaka division generates the highest revenue, indicating a dominant regional market presence.
- Brand Performance:** Coca-Cola and Diet Coke consistently lead in both total revenue and overall profitability.
- Sales Trends:** Revenue shows significant weekday and monthly fluctuations, suggesting strong impacts from seasonal demand and targeted promotions.

TECHNICAL HIGHLIGHTS

- Engineered a Star-Schema data model and developed advanced DAX measures for dynamic time-intelligence and unit pricing.
- Designed a custom UI/UX with interactive cross-filtering, dynamic slicers, and seamless drill-through capabilities.

Case Study 02: Enterprise HR & Workforce Demographics Analytics

POWER BI

Executive Level Talent Analytics, Attrition Monitoring & Payroll Distribution

OBJECTIVE

To monitor workforce demographics, analyze attrition drivers, and track payroll distribution to empower HR with data-driven retention strategies.

Case Study 03: E-Commerce Sales Performance Dashboard

TABLEAU

Multi-Dimensional E-Commerce Performance, Regional Revenue & Category Breakdown

OBJECTIVE

To evaluate e-commerce sales performance, identify top revenue-generating categories, and analyze payment preferences to drive sales growth.

E-Commerce Sales Performance Dashboard

KEY BUSINESS INSIGHTS

- Top Categories:** Electronics and Clothing dominate the sales volume, generating the highest overall revenue.
- Payment Preferences:** Card transactions significantly outperform Cash on Delivery (COD) and Digital Wallets, indicating a strong digital payment adoption.
- Regional Balance:** Revenue is fairly distributed, with the East and North regions slightly leading the market share.

TECHNICAL HIGHLIGHTS

- Formulated calculated fields and interactive parameters for dynamic region, category, and payment method filtering.
- Optimized Tableau dashboard layout combining high-density time-series analysis with clear KPI benchmarking.
